Cleaned for Medical Service

Specialists in UHP cleaning and packaging

AES cleans and packages 316L SS, Nickel, and Nickel Alloys to meet stringent Medical Service requirements:

- ***Cleaning and Packaging exceeding Medical Service requirements***
- ***Packaging in Class 100 Cleanrooms***
- ***UHP Packaging ready to Sterilize***

Benefits include:

- **One source for EP, Cleaning and Packaging**

- **Easily meet any customer finishing and packaging requirements**
- **Lot traceability maintained through to packaging**

Now you can get your own products UHP processed including 316L SS, Nickel and Nickel Alloy.

Leverage your ability to produce high quality products with upgrading them to any level of customer cleanliness requirements.

AES produces millions of UHP components every year for Semiconductor Manufacturing Equipment. The cleanliness requirements for these components is truly "Space Age".

AES contracts with special customers like you to use the same processes to upgrade your products to these same levels.
