

"the perfect surface is less than a micron away"

Leaders in custom UHP surface finishing

Specialists in UHP Surfaces

AES can provide for all of your Ultra High Purity (UHP) finishing needs from initial consultation, specification development, and high volume manufacturing.

AES capabilities include:

- **EP of extremely small bores in tubing and components**
- **Cleaning and Packaging to semi-conductor specifications**
- **Material evaluation and specification**
- **High volume manufacturing**

AES has a distinguished history of providing unique Ultra High Purity tubing and components to major industries including: semi-conductor, analytical, bio-medical, pharmaceutical and aerospace.

The unique abilities to **EP** fine orifices in tubing and components combined with high volume production allow AES to satisfy all of your **UHP** surface requirements.

Small Bore Finishing Specialists
